

**Note when using this template:**  
Please use three versions of this template, one for the colour front print, one for the colour rear print and one for the front foil print.

For the front foil print, the artwork should just be black and white with no gradients. The black areas will print in the foil colour that you choose, the white areas will not have any foil print.

For the front and back colour artwork, please extend any backgrounds outside the pink dashed line (indicating the trimmed area) in the template by about 3mm to create a bleed margin to avoid any white edges once printed and trimmed.
